

DVR Examiner 3

by DMEforensics

More. Easier. Faster

With updated performance and recovery capabilities

DVR Examiner is the software of choice for thousands of Law Enforcement Agencies, Forensic Examiners and Investigators around the world. Recover video and metadata evidence from DVR surveillance systems in a forensically sound manner. Save time and money by recovering directly from the DVR, bypassing passwords.

MORE

More data sources. Need to examine data from more than one DVR? DVR Examiner can scan, preview and save data from multiple sources under a single case.

More filesystems. The list of DVR filesystems is growing all the time. DVR Examiner includes support for highly requested filesystems, and we continue to add more to what is already the industry's largest library of access in future releases.

More options and tools. DVR Examiner's application and user settings give you more control over your case data and allowing for more customization.

EASIER

Easier to use. DVR Examiner's interactive user interface makes finding what you need intuitively easier, allowing you to quickly add locations, devices, and sources.

Easier Clip List layout. DVR Examiner's Clip List allows you to take full advantage of supporting multiple sources. View one or multiple sources all at once, apply filters, sort and search for the clips you need.

Easier Case Management. Create an entire case file around your source data; add case and incident details, location, devices, and sources.

FASTER

Faster performance. DVR Examiner's scans deliver results up to 3 times faster than the time it currently takes to detect and scan a drive.

Faster Clip Review. Nearly instantaneous clip sorting and filtering, allows you to sort through clips from multiple sources faster than ever before.

Faster Time to Evidence. The multiple source features allows you to examine all available case data in a single case, rather than having to start a new case for each source.

"The whole program has been such a game-changer, going from reverse engineering to trying to get the DVR to work. I don't even go through the menu of the DVR, I just pull the drive and let DVR Examiner do all the work. DVR Examiner has been leading the way, that's for sure. It's really astonishing to most agencies when they spend weeks on a DVR and we plug it into DVR Examiner, and there you go!" -Roger Cain, Digital Forensics Supervisor

Discover all the recoverable video evidence and metadata of your crime scene and its surrounding area.

DVR Examiner 3 Key Features

✓ Export and Recover Video

DVR Examiner offers a forensically safe option for surveillance DVR data recovery; Queue exports of native or open video and save time with the included export report.

✓ Direct Hard Drive Access

By accessing the DVR hard drive (or forensic image) directly, DVR Examiner can identify and recover video significantly faster than manually exporting individual clips from the DVR itself.

✓ Multiple Sources

Recover video from Physical Hard Disks, EOI Image Files, Raw (dd) Images and any other mounted image format.

✓ Bypass Passwords

By accessing the surveillance DVR hard drive directly, DVR Examiner is able to bypass any system passwords and recover data from non-functioning systems.

✓ Inaccessible Video

On supported systems, DVR Examiner can recover video that is no longer accessible to the DVR; This allows you to recover formatted, deleted, or partially overwritten video.

✓ Burnt or Damaged DVR

By working with the DVR hard drive directly, DVR examiner can recover video from non-functioning DVR systems.

✓ Data / Date Correction

Is the DVR showing an incorrect date or time? Use the simple offset configuration options and let DVR Examiner correct the times for you.

✓ Multiple Formats

Looking to export both playable AVIs and native files? Save time by exporting both formats at the same time.

✓ Detailed Reporting

Save time and stop taking notes of every clip you export; DVR Examiner includes a suite of detailed and configurable reports.

"When we got DVR Examiner 3.0, I was so excited because it's fantastic! This is a great improvement; It was an intuitive transition from 2.9 to 3.0"

- Craig Janson, Forensic Imaging Technician, Lakewood Police Department
